Journey to Star Wars: The Force Awakens: Lost Stars

HarperCollins

CEO Artur Drakon has been betrayed. The Syndicate Worlds' government failed to protect its citizens from both the Alliance and the alien enigmas. With a cadre of reliable soldiers under his command, Drakon launches a battle for control of the Midway Star System—assisted by an ally he's unsure he can trust... CEO Gwen Icení was exiled to Midway because she wasn't ruthless enough in the eyes of her superiors. She proved them wrong by commandeering some of the warships at Midway and declaring

the star system's independence on behalf of the people though staying in charge as "President." But while she controls the mobile fleet, she has no choice but to rely on "General" Drakon's ground forces to keep the peace planet-side. If their coup is to succeed, Drakon and Icení must put their differences aside to prevent the population of Midway from rebelling against them, to defend their star system from the enigmas—and to ferret out saboteurs determined to reestablish Syndic rule...

The Lost Stars: Shattered Spear Child's Play Library

This book identifies the 'lost stars' of Bayer, Lacaille, Flamsteed, and other pioneering astronomers of the 17th and 18th centuries, and explains how and why these stars seem to have disappeared from modern star catalogues and atlases. In a style that will appeal to the novice as well as the seasoned astronomer, the author provides an introduction to early modern astronomy. The book reviews the composition and history of the 88 constellations recognised by the International Astronomical Union. In an account for each constellation the author includes a synopsis, in chart form, that tells the reader at a glance how many lettered or numbered stars there are in the constellation, the magnitude and catalogue numbers for those stars, and who first lettered or numbered each star. The author then describes the stars that have been 'lost' or mislabelled and explains, in detail, their

troublesome status.
