From the #1 international bestselling author: a woman wakes up on a Central Park bench with no memory of how she got there in this "unpredictable and moving psychological thriller that keeps you holding your breath" (Métro) Alice, a fierce and respected Parisian cop, wakes up on a Central Park bench with no memory of the night before, handcuffed to a complete stranger—a musician named Gabriel. Disoriented, dazed, and with someone else's blood on her shirt, Alice works furiously to reconnect the dots. She remembers clubbing with her friends the night before on the Champs-Élysées. Gabriel claims he was playing a gig in Dublin. Was she drugged? Kidnapped? Why is the gun in her jacket pocket missing a bullet? And whose blood is on her clothes? Over the next twenty-four hours, Alice and Gabriel race across New York in search of answers, stumbling upon a startling set of clues that point to a terrible adversary from the past. Alice must finally confront her memories of hunting the serial killer who took everything from her—a man she thought was dead, until now. From France's #1 bestselling author, *Central Park* is a taut and suspenseful thriller that will keep readers riveted until its final shocking twist.

This book focuses on the key elements of the Django Reinhardt Gypsy jazz or jazz Manouche guitar style. The information revealed here was gleaned from years of experience jamming with French Gypsies and studying with masters of the style. A native of France, Stephane Wrembel acquired his skills entirely by ear and has taught scores of musicians worldwide using the method that appears here in text and notation for the first time. Written in English, German and French with all musical examples in standard notation and tablature, Wrembel conveys his knowledge in a logical step by step manner, exposing the reader to the authentic Manouche style as it continues to evolve in France and Holland. Medium to advanced in difficulty, this method is designed for the guitarist who is already familiar with jazz harmony and note locations on the fretboard.

Neurology abounds with eponyms--Babinski's sign, Guillain-Barre' syndrome, Alzheimer's disease, etc. Neurologists and neuroscientists, however, are often hazy about the origin of these terms. This book brings together 55 of the most common eponyms related to the neurological examination, neuroanatomy, and neurological diseases. The chapters have a uniform structure: a short biography, a discussion of and a quotation from the original publication, and a discussion of the subsequent evolution and significance of the eponym. Photographs of all but two of the eponymists have been included. The material is organized into sections on anatomy and pathology, symptoms and signs, reflexes and tests, clinical syndromes, and diseases and defects. The selection of eponyms was based on the frequency of use, familiarity of clinical neurologists with the concept, and the significance within neurology of the individual who coined the eponym. This volume covers some of

the classic ideas in the history of clinical neurology. It will be of interest to neurologists, neuroscientists, medical historians, and their students and trainees.

Getting into Gypsy Jazz Guitar Little, Brown

This monograph proposes a reconstruction of the lexicon, the morphophonology and the noun class system of Proto-Fula-Sereer (~3500 BP). Fula-Sereer represents one of the six branches of the North-Atlantic group. North-Atlantic, together with the Bak group of languages, forms the Atlantic family, which represents a separate branch within the Niger-Congo macro-family. The lexical reconstruction of the proto-language of a group such as Fula-Sereer requires the solution of a number of questions that are of interest for the general theory of comparative studies. These questions deal with the morphophonological mutations of root-initial consonants. Since consonant mutations were structured into morphological paradigms already at the Proto-Fula-Sereer stage, the evolution of initial consonantism in Fula and Sereer was based not on regular phonetic changes, but on massive irregular analogous changes. The reconstruction of Proto-Fula-Sereer consonant mutations is given in Chapter 2. In Chapters 3-6 the author proposes a reconstruction of the initial consonants. Next, the reconstruction of final consonants (Chapter 7) as well as vowels (Chapter 8) is given. In Chapter 9, taking in account the lexical cognates, the long-standing problem of the PFS noun class reconstruction is rediscussed. The Appendix provides a list of ~720 lexical reconstructions and their approximate meanings.
