Fast Lane to Heaven Routledge
The history of medicine is as old as the
history of human civilization. In *The
Medical Book*, popular science writer
Clifford A. Pickover explores 250
milestone discoveries in medicine that
span more than 12,000 years. Whether

writing on 'hard science' topics such as DNA structure, reverse transcriptase and AIDS, polymerase chain reaction, and magnetic resonance imaging (MRI), or ideas from the medical fringe such as witch doctors, patent medicines, bloodletting, and near-death experiences, Pickover brings insight and acumen to the broad spectrum of medical studies and makes it understandable to all readers. This volume is abundantly illustrated in full colour with clinical and historical art.

Erasing Death Peter Lang Pub
Incorporated

Coming back from death is a powerful and life-changing experience. Before I came back from death, I was told that I was coming back with a mission in life. My mission was not clearly defined for me at first, but I now find that each and every day it is being defined for me more clearly. The experience has set me upon a path of self-discovery and spiritual enlightenment that continues to provide me with glimpses into the afterlifeglimpses that I would now like to share with you. Prior to finding myself at death's door, I was not by nature inclined to share anything with anybody, but now I believe it is important that I share my experiences with you.

Shufflebrain Routledge

Dr. Sam Parnia faces death every day. Through his work as a critical-care

doctor in a hospital emergency room, he became very interested in some of his patients' accounts of the experiences that they had while clinically dead. He started to collect these stories and read all the latest research on the subject, and then he conducted his own experiments. That work has culminated in this extraordinary book, which picks up where Raymond Moody's *Life After Life* left off. Written in a scientific, balanced, and engaging style, this is powerful and compelling reading. This fascinating and controversial book will change the way you look at death and dying.

European Voices IOS Press

Roman epic is both index and critique of the foundational culture of the western world. It is one of Europe's most

persistent and determinant poetic modes. In this book distinguished Latinists examine the formation and evolution of Roman epic from its beginnings in the third century BC to the high Italian Renaissance. Featuring a variety of methodologies and approaches, it clarifies the literary importance and political and moral meaning of Roman epic.

Data Tutashkhia Sterling New York
Notwithstanding its detractors, evolutionary science has anticipated modern genetic research and continued to illuminate mysteries about our past and our connectedness to the species around us. Detailing the evolutionary process and speciation as well as the continuing debates about evolution's inherent validity, this engrossing volume

considers all aspects of this exciting field of study.

Do They Sound Like Bells Or Like Howling Wolves? Octagon Press, Limited

My first experience with "death" happened on the night of July 2, 1984. Since then, books, movies, and television documentaries have popularized the term "near-death experience" to describe an event that has been experienced by millions of people who have been at death's door. But back in 1984 I was alone with my experience. I couldn't share it with anyone. From the book: "Coming back from death is a powerful and life-changing experience. Before I came back from death, I was told that I was coming back with a mission in life. My

mission was not clearly defined for me at first, but I now find that each and every day it is being defined for me more clearly. The experience has set me upon a path of self-discovery and spiritual enlightenment that continues to provide me with glimpses into the afterlife--glimpses that I would now like to share with you. Prior to finding myself at death's door, I was not by nature inclined to share anything with anybody, but now I believe it is important that I share my experiences with you.

What Happens When We Die? Akshay Sonthalia

The Nonprofit Sector in Eastern Europe, Russia, and Central Asia uniquely provides a timely overview of research on the nonprofit sector and nonprofit organizations in eleven former Soviet

republics, with each central chapter written by local experts.

A Book of Wisdom and Lies Böhlau Verlag Wien

Throughout history, the mystery of death has captivated artists, scientists, philosophers, physicians, and theologians. This eerie chronology ventures to the borderlines of science and sheds light into the darkness, exploring such diverse topics as the Maya death gods, golems, séances, zombies, and quantum immortality. With the turn of every page, readers will encounter beautiful artwork and unexpected insights about death and what may lie beyond.

Folk Song Style and Culture Harper Collins

Chronologically documents two hundred

and fifty medical milestones from 10,000 B.C. to modern times, including the history of separating conjoined twins, the discovery of viruses, and the Human Genome Project.

The Palgrave Handbook of Global Social Work Education Corwin Press

Raise your ELL success quotient and watch student achievement soar! How the ELL Brain Learns combines current research on how the brain learns language with strategies for teaching English language learners. Award-winning author and brain research expert David A. Sousa describes the linguistic reorganization needed to acquire another language after the age of 5 years. He supplements this knowledge with immediately applicable tools, including: A self-assessment

pretest for gauging your understanding of how the brain learns languages Brain-compatible strategies for teaching both English learners across content areas An entire chapter about how to detect English language learning problems Philosophy and Synergy of Information Union Square & Company Poets Choice is a poetry book publishing brand registered and having its head office in Mumbai, India. We are on the verge of setting up our offices in USA as well. We have been around since 2010. Our writers hail from over 48 countries across the world. To view the complete list visit our website. We welcome book reviews on our website - www.poetschoice.in . Books can also be ordered directly from our website. Now, video and audio reviews can be sent

across to us via this link - poetschoice.submittable.com/submit Simply submit your review in the 'Video Book reviews' or 'Audio Book Reviews' form. For suggestions, we can be contacted via our Instagram handle - @poetschoice. We are also there on Youtube - Poets Choice **The Medical Book** Springer Science & Business Media This study represents a thorough investigation of a polyphonic vocal village tradition in Bistritsa, Bulgaria. Outsiders describe the narrow intervals of these songs as being -maximally rough-, while the singers themselves experience their performance as smooth, beautiful and pleasant. Almost identical polyphonic traditions can be found in places sometimes thousands of

kilometers apart. This inquiry is carried out within a very broad and comparative context, whereby historical sources, the origin of different constituents and etymologies as well as electronic sound analysis are taken into account. The results are stunning and ever more relevant - and not just for ethnomusicologists: The babi or grannies of Bistritsa and their songs have been inscribed on UNESCO's List of Intangible Cultural Heritage of Mankind in 2008." *How the ELL Brain Learns* Hay House, Inc

This book reflects the shift in design paradigm in automobile industry. It presents future innovations, often referred as "automotive systems engineering". These cause fundamental innovations in the field of driver assistance systems and electro-mobility

as well as fundamental changes in the architecture of the vehicles. New driving functionalities can only be realized if the software programs of multiple electronic control units work together correctly.

This volume presents the new and innovative methods which are mandatory to master the complexity of the vehicle of the future.

Music and Musicians in Ancient Egypt

Hampton Roads Publishing

This handbook addresses the issues and challenges of the delivery of social work education in the contemporary world. It provides an authoritative overview of the key debates, switching the lens away from a Western-centric focus to engage with a much broader audience in countries that are in the process of modernization and professionalization,

alongside those where social work education is more developed. Chapters tackle major challenges with respect to curriculum, teaching, practice, and training in light of globalization, providing a thorough examination of the practice of social work in diverse contexts. This handbook presents a contribution to the process of knowledge exchange which is essential to global social work education. It brings together professional knowledge and lived experience, both universal and local, and aims to be an essential reference for social work educators, researchers, and students.

Britannica Educational Publishing
Song and dance style--viewed as nonverbal communications about

culture--are here related to social structure and cultural history. Patterns of performance, theme, text and movement are analyzed in large samples of films and recordings from the whole range of human culture, according to the methods explained in this volume. Cantometrics, which means song as a measure of man, finds that traditions of singing trace the main historic distributions of human culture and that specific traits of performance are communications about identifiable aspects of society. The predictable and universal relations between expressive communication and social organization, here established for the first time, open up the possibility of a scientific aesthetics, useful to planners.

The Man in the Panther's Skin

Erasing Death: The Science That Is Rewriting the Boundaries Between Life and Death reveals that death is not a moment in time. Death, rather, is a process—a process that can be interrupted well after it has begun. Innovative techniques have proven to be effective in revitalizing both the body and mind, but they are only employed in approximately half of the hospitals throughout the United States and Europe. Dr. Sam Parnia, Director of the AWARE Study (AWAREness during RESuscitation) and one of the world's leading experts on the scientific study of death and near-death experiences (NDE), presents cutting-edge research from the front lines of critical care and resuscitation medicine while also shedding light on the ultimate mystery:

What happens to human consciousness during and after death? Dr. Parnia reveals how some form of “afterlife” may be uniquely ours, as evidenced by the continuation of the human mind and psyche after the brain stops functioning. With physicians such as Dr. Parnia at the forefront, we are on the verge of discovering a new universal science of consciousness that reveals the nature of mind and a future where death is not the final defeat, but is, in fact, reversible.

Death and the Afterlife

Typical mild "Sachsenian" humor and illustrated with a wealth of examples and evidence. I doubt whether any other of us ethnomusicologists would have been capable of writing such a comprehensive study: Sachs had at his fingertips a phenomenal amount of factual

information. Sometimes, under his wise guidance, complicated propositions become surprisingly simple. The reader will be as fascinated as I was by the originality of some of his conclusions, captivated by his penetrating comparisons, and charmed by his rich and expressive language. After having lived with this book for a period of some months, I realize all the more what the death of Curt Sachs means to the musicological world. "The Wellsprings of Music" forms a worthy close to that long series of publications his boundless energy and unsurpassed knowledge have given us. I feel greatly indebted to

Dr. Eric Werner, New York, for his decisive encouragement towards the publication of this work and for the active interest he took in it. I want also to express my gratitude to the musicologist Miss Marijke Charbon, The Hague, for having made an Index of Names and for some useful suggestions. Amsterdam, 15th February 1960 JAAP KUNST My dear friend Jaap Kunst did not live to see this book in print. I wish to express my deep gratitude to him, whose dedicated help and unfailing and devoted interest made its publication possible.
