RAYMOND HUDSON

Pteranodon Harry N Abrams Incorporated
 Five-year-old dinosaur expert Eric feels bad when he mistakes a great blue heron for a flying pteranodon, until he discovers the possible relationship between dinosaurs and modern birds.

Pteranodon Creative Company

Two very distinctive dinosaurs pair up in this book to offer hours of craft-making glee. Parents will jump at the opportunity to give their children a gift that kids will love, and that actually develops valuable reasoning and motor control skills. Ages 6 and up.

Pterosaurs The Rosen Publishing Group, Inc

Allows early readers to learn about these

prehistoric beasts and their contemporaries in accurate and enjoyable words and pictures.

Pteranodon Soars ABDO

A young child adventures back in time to 80 million years ago to meet a Velociraptor, learning about what this feathered dinosaur ate, its size, and which dinosaurs were its prey. This illustrated narrative nonfiction title includes a range map, glossary, and further resources.

Dinosaur Egg Day! Sidestone Press

In graphic novel format, follows the life of a pteranodon during the Cretaceous period as it grows from an egg to a full-grown adult.

Pteranodon Amicus/Amicus Illustrated
 Buddy and his family experience some exciting weather in this 3-in-1 8x8. The first story finds Pteranodon Terrace in a drought, followed by Buddy and his family

taking shelter from a big rainstorm in the cave below their nest. Finally, the Pteranodon family meets two animals who traveled across the ocean during the storm, and they all take the Dinosaur Train to help the animals find their way home.

Pterosaurs Amicus Ink

The most authoritative illustrated book on flying reptiles available For 150 million years, the skies didn't belong to birds—they belonged to the pterosaurs. These flying reptiles, which include the pterodactyls, shared the world with the nonavian dinosaurs until their extinction 65 million years ago. Some pterosaurs, such as the giant azhdarchids, were the largest flying animals of all time, with wingspans exceeding thirty feet and standing heights comparable to modern giraffes. This richly illustrated book takes an unprecedented look at these

astonishing creatures, presenting the latest findings on their anatomy, ecology, and extinction. Pterosaurs features some 200 stunning illustrations, including original paintings by Mark Witton and photos of rarely seen fossils. After decades of mystery, paleontologists have finally begun to understand how pterosaurs are related to other reptiles, how they functioned as living animals, and, despite dwarfing all other flying animals, how they managed to become airborne. Here you can explore the fossil evidence of pterosaur behavior and ecology, learn about the skeletal and soft-tissue anatomy of pterosaurs, and consider the newest theories about their cryptic origins. This one-of-a-kind book covers the discovery history, paleobiogeography, anatomy, and behaviors of more than 130 species of pterosaur, and also discusses their demise at the end of the Mesozoic. The most comprehensive book on pterosaurs ever published Features some 200 illustrations, including original paintings by the author Covers every known species and major group of pterosaurs Describes pterosaur anatomy, ecology, behaviors, diversity, and more Encourages further study with 500 references to primary pterosaur literature

Drawing Pteranodon and Other Flying Dinosaurs Capstone

Discusses the physical characteristics, habitat, food, relatives, and extinction of this flying reptile that lived on the Earth during the Age of Dinosaurs.

Do You Really Want to Meet a Pterosaur? Av2

This action-packed book tells the story of a baby Pteranodon that hatches on the side of a cliff. Soon he must learn to fly, then hunt, and find a mate to begin the cycle anew. Full color.

The Dinosaur Series - Pteranodon Princeton University Press

Which other reptiles lived during the age of the dinosaurs? What was a pterosaur? How did they live? What did they eat?

Were they like any animals in today's world?

The Dino Expert Penguin

Learn about the Pteranodon, including what it ate and where it was found.

Do You Really Want to Meet

Velociraptor? The Rosen Publishing Group, Inc

This beginning reader title introduces Pteranodon by covering when it lived, what it looked like, what it ate, and where some of its fossils have been found. This title is a Level 1 and is written specifically for beginning readers. Aligned to the Common Core standards & correlated to state standards. Dash! is an imprint of Abdo Zoom, a division of ABDO.

Do You Really Want to Meet Apatosaurus? Rourke Publishing Group

Meet Buddy. He's just like any other T. Rex . . . except that he lives with a family of pteranodons! Join him for a peek inside his world, and meet all of his dinosaur family and friends. Packed with full-color images from the show, this simple board book is perfect for readaloud fun. From the Board edition.

Let's Go to Volcano Valley!. Greenhaven Publishing LLC

Introduces the flying reptile that lived on the earth during the age of dinosaurs.

Flying Giants Simon and Schuster

Travel millions of years back in time to meet the pteranodon! Learn everything from what the pteranodon looked like to what it ate, and even where their goliath fossils have been found today. Complete with a More Facts section and bolded glossary terms. Young readers will gather basic information about the pteranodon through easy-to-read, simple text alongside colorful images! Translated by native Spanish speakers. Aligned to Common Core standards and correlated to state standards. Abdo Kids is a division of ABDO.

Pteranodon Kumon Pub North America Limited

New titles in our popular animal series introduce young readers to five dinosaur species plus a family of flying prehistoric reptiles (the Pterosaurs). In each book, a child explorer travels back in time to meet these incredible animals and shares his or her experiences, which are based on fossil finds. Delightful illustrations and carefully crafted text help the stories come alive, making these books both educational and entertaining. A young child adventures back in time to 80 million years ago to meet the Pteranodon, one species of pterosaur, and learns what they ate, how they laid eggs, and how they lived with dinosaurs. This illustrated narrative nonfiction title includes a map of fossil findings, glossary, and further resources. Winged and Toothless Smithsonian Prehistoric Zone

One hundred million years ago, the skies were filled with enormous flying reptiles. With wings spans up to nearly forty feet, pterosaurs were the dominant life form on earth.

Tiny Ptery, Come Home! Capstone Dinosaurs were not the only giant reptiles inhabiting Earth during the late Cretaceous period. Pteranodons were there too, winging their way through the prehistoric skies. These large flying reptiles must have been an amazing sight to see as they swooped down to catch prey from the water. Readers will dive into prehistory and find out more about these fascinating reptiles—from their habitat to their choice of food.

Pteranodon Penguin

This book will teach kids how to render three flying dinosaurs by following step-by-step instructions. Students are taught how to draw the huge wingspan of Pteranodon, the feathered body of Archaeopteryx, and the razor-sharp teeth of Tropeognathus.

Buddy's World Bearport Publishing

Introduces the pteranodon, a kind of pterodactyl, or flying reptile, that lived on the earth during the age of dinosaurs.
