A sweeping cultural survey reminiscent of Barzun's *From Dawn to Decadence*. "At irregular times and in scattered settings, human beings have achieved great things. Human Accomplishment is about those great things, falling in the domains known as the arts and sciences, and the people who did them." So begins Charles Murray's unique account of human excellence, from the age of Homer to our own time. Employing techniques that historians have developed over the last century but that have rarely been applied to books written for the general public, Murray compiles inventories of the people who have been essential to the stories of literature, music, art, philosophy, and the sciences—a total of 4,002 men and women from around the world, ranked according to their eminence. The heart of *Human Accomplishment* is a series of enthralling descriptive chapters: on the giants in the arts and what sets them apart from the merely great; on the differences between great achievement in the arts and in the sciences; on the meta-inventions, 14 crucial leaps in human capacity to create great art and science; and on the patterns and trajectories of accomplishment across time and geography. Straightforwardly and undogmatically, Charles Murray takes on some controversial questions. Why has accomplishment been so concentrated in Europe? Among men? Since 1400? He presents evidence that the rate of great accomplishment has been declining in the last century, asks what it means, and offers a rich framework for thinking about the conditions under which the human spirit has expressed itself most gloriously. Eye-opening and humbling, *Human Accomplishment* is a fascinating work that describes what humans at their best can achieve, provides tools for exploring its wellsprings, and celebrates the continuing common quest of humans everywhere to discover truths, create beauty, and apprehend the good.

Under the influence of his teacher, Louis de la Valle Poussin, Prof. Lamotte published several works in French, which were primarily editions, translations and commentaries on Tibetan and Chinese Buddhist texts. The theories and concepts contained in this particular work are closely related to those of the *Abhidharmakosa*, and as such it makes a valuable companion to that larger work. Here Prof. Pruden has provided a masterful English translation of Prof. Lamotte's work, and has added a brief biography of Prof. Lamotte and his scholarly accomplishments to

familiarize the reader with this great scholar of Buddhism.

Novembre 1932. Théodore Poussin est au Havre. Il embarque en tant que commissaire de bord sur le Cap Padaran, en partance pour l'Extrême-Orient. Sur le quai, un tueur en série rôde. Se pourrait-il qu'il se soit caché à bord parmi les passagers, une troupe de théâtre de boulevard qui s'est fait une spécialité des mises en scène sanguinolentes ? Théodore en est persuadé, après avoir reconnu parmi eux une vieille connaissance, Barthélemy Novembre, en qui il n'a pas du tout confiance.

A new perspective on life satisfaction and well-being over the life course What makes people happy? The *Origins of Happiness* seeks to revolutionize how we think about human priorities and to promote public policy changes that are based on what really matters to people. Drawing on a range of evidence using large-scale data from various countries, the authors consider the key factors that affect human well-being, including income, education, employment, family conflict, health, childcare, and crime. The *Origins of Happiness* offers a groundbreaking new vision for how we might become more healthy, happy, and whole.

While a short work of only eight verses and a three-page

autocommentary, the *Investigation of the Percept* has inspired epistemologists for centuries and has had a wide-ranging impact in India, Tibet, and China. Dignaga, one of the major figures in Buddhist epistemology, explores issues such as the relation between the mind and its percepts, the problems of idealism and realism, and the nature of intentionality in this brief but profound text. This volume provides a comprehensive history of the text in India and Tibet from 5th century India to the present day. This team of philologists, historians of religion and philosophers who specialize in Tibetan, Sanskrit and Chinese philosophical literature has produced the first study of the text and its entire commentarial tradition. Their approach makes it possible to employ the methods of critical philology and cross-cultural philosophy to provide readers with a rich collection of studies and translations, along with detailed philosophical analyses that open up the intriguing implications of Dignāga's thought and demonstrate the diversity of commentarial approaches to his text. The comprehensive nature of the work reveals the richness of commentary in Indian and Tibetan Buddhism and shows surprising parallels between the modern West and traditional Buddhist philosophy.

Like music, art is a universal language. Although looking at works of art is a pleasurable enough experience, to appreciate them fully requires certain skills and knowledge." --Carol Strickland, from the introduction to *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* * This heavily illustrated crash course in art history is revised and updated. This second edition of Carol Strickland's *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* offers an illustrated tutorial of prehistoric to post-modern art from cave paintings to video art installations to digital and Internet media. * Featuring succinct page-length essays, instructive sidebars, and more than 300 photographs, *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* takes art history out of the realm of dreary textbooks, demystifies jargon and theory, and makes art accessible—even at a cursory reading. * From Stonehenge to the Guggenheim and from Holbein to Warhol, more than 25,000 years of art is distilled into five sections covering a little more than 200 pages.

Paul Klee was endowed with a rich and many-sided personality that was continually spilling over into forms of expression other than his painting and that made him one of the most extraordinary phenomena of modern European art. These abilities have left their record in the four intimate diaries in which he faithfully recorded the events of his inner and outer life from his nineteenth to his fortieth year. Here, together with recollections

of his childhood in Bern, his relations with his family and such friends as Kandinsky, Marc, Macke, and many others, his observations on nature and people, his trips to Italy and Tunisia, and his military service, the reader will find Klee's crucial experience with literature and music, as well as many of his essential ideas about his own artistic technique and the creative process.

"Quid est secretum? Visual Representation of Secrets in Early Modern Europe, 1500-1700 is the companion volume to *Intersections* 65.1, *Quid est sacramentum? Visual Representation of Sacred Mysteries in Early Modern Europe, 1400-1700*. Whereas the latter volume focused on sacramental mysteries, the current one examines a wider range of secret subjects. The book examines how secret knowledge was represented visually in ways that both revealed and concealed the true nature of that knowledge, giving and yet impeding access to it. In the early modern period, the discursive and symbolical sites for the representation of secrets were closely related to epistemic changes that transformed conceptions of the transmissibility of knowledge"--éd.

Human experience is not confined to waking life. Do experiences in dreams matter? Humans are not the only living beings who have experiences. Does nonhuman experience matter? The Buddhist philosopher Vasubandhu, writing during the late fourth and early fifth centuries C.E., argues in his work *The Twenty Verses* that these alternative contexts ought to inform our understanding of mind and world. Vasubandhu invites readers to explore experiences in dreams and to inhabit the experiences of nonhuman beings—animals, hungry ghosts, and beings in hell. *Other Lives* offers a deep engagement with Vasubandhu's account of mind in a global philosophical perspective. Sonam

Kachru takes up Vasubandhu's challenge to think with perspective-diversifying contexts, showing how his novel theory draws together action and perception, minds and worlds. Kachru pieces together the conceptual system in which Vasubandhu thought to show the deep originality of the argument. He reconstructs Vasubandhu's ecological concept of mind, in which mindedness is meaningful only in a nexus with life and world, to explore its ongoing philosophical significance. Engaging with a vast range of classical, modern, and contemporary Asian and Western thought, *Other Lives* is both a groundbreaking work in Buddhist studies and a model of truly global philosophy. The book also includes an accessible new translation of *The Twenty Verses*, providing a fresh introduction to one of the most influential works of Buddhist thought.

Type and Image The Language of Graphic Design Philip B. Meggs What is the essence of graphic design? How do graphic designers solve problems, organize space, and imbue their work with those visual and symbolic qualities that enable it to convey visual and verbal information with expression and clarity? The extraordinary flowering of graphic design in our time, as a potent means for communication and a major component of our visual culture, increases the need for designers, clients, and students to comprehend its nature. In this lively and lavishly illustrated book, the author reveals the very essence of graphic design. The elements that combine to form a design—sings, symbols, words, pictures, and supporting forms—are analyzed and explained. Graphic design's ability to function as language, and the innovative ways that designers combine words and pictures, are discussed. While all visual arts share common spatial properties, the author demonstrates that graphic space has unique characteristics that are determined by its communicative function. Graphic designs can have visual and symbolic properties which empower them to communicate with deep expression and meaning. The author defines this property as graphic resonance and explains how it occurs. After defining design as a problem-solving process, a model for this process is developed and illustrated by an in-depth analysis of actual case histories. This book will provide insight and inspiration for everyone who is

interested or involved in graphic communications. While most materials about form and meaning in design have a European origin, this volume is based on the dynamic and expressive graphic design of America. The reader will find inspiration, hundreds of exciting examples by many of America's outstanding graphic designers, and keen insights in *Type and Image*.

Published to accompany a major exhibition of Jean-Baptiste-Camille Corot's paintings held in Paris and Ottawa during 1996, and forthcoming to New York. From nearly 3,000 paintings by this poetic 19th-century artist, the curators chose 163 works, which are reproduced here along with full art-historical discussions of each. Three major essays chronicle Corot's life and the development of his art; additional essays elucidate the subject of forgeries and describe the collecting of his works. Much original new scholarship is included along with a review of the scholarly literature, a concordance, and a chronology. 9.5x12.5"Annotation copyrighted by Book News, Inc., Portland, OR
