"Douglas Beasley travels as a seeker, not as a tourist. He makes photographs not as a reaction to the otherness of people, places and cultures, but because of a feeling that exists deep within himself. His destinations in the world are connected by his photographs which give visible form to invisible maps of the eternal. And these images are often of ordinary unnoticed aspects of reality - miraculous imaginings of beauty, suffering and longing of the human body, mind and soul. They become maps pointing to our original mind and various incarnations of earth spirits. ..."--Back cover.

Kindling the Native Spirit reveals secrets to enhance your connection to the mysterious forces around you. It's a mystic map that guides the way for you to follow in the footsteps of the wise ones who have gone before you. And in a deeper way, it ignites the majestic native soul that dwells within you, which in turn reestablishes your relationship to the sacred whole. Denise Linn, a member of the Cherokee Nation, has gleaned wisdom from tribal traditions around the world, including the Zulu in Africa, the Maori in New Zealand, the Aborigines of Australia, and various Native American tribes in North America, along with other indigenous cultures. In this groundbreaking book, she shares specific methods to open gateways to mystical encounters and the knowledge that enables you to activate ancient healing practices in your present-day life. You'll learn how to discover your true name, determine your animal ally, embark on sacred spirit journeys, and experience vision quests. In addition, there are step-by-step instructions on how to make a rattle, dream catcher, spirit stick, prayer feather, and your own medicine bag. Denise also shares little-known methods to shape-shift; tap into your ability to "call" animals, plants, and Spirit; invite the power of the guardians of the four directions; gain protection from your ancestors; spend time with the "little people"; utilize the power of "earthing" to bring wholeness . . . and much more. Ignite your native spirit within, and enter a wondrous realm of profound visionary experiences!

In the late 1700s, when Euro-Americans began to visit the Northwest Coast, they reported the presence of vigorous, diverse cultures--among them the Tlingit, Haida, Kwakwaka'wakw (Kwakiutl), Nuu-chah-nulth (Nootka), Coast Salish, and Chinookans--with a population conservatively estimated at over 180,000. A century later only about 35,000 were left. The change was brought about by the introduction of diseases that had originated in the Eastern Hemisphere, such as smallpox, malaria, measles, and influenza. *The Coming of the Spirit of Pestilence* examines the introduction of infectious diseases among the Indians of the Northwest Coast culture area (present-day Oregon and Washington west of the Cascade Mountains, British Columbia west of the Coast Range, and southeast Alaska) in the first century of contact and the effects of these new diseases on Native American population size, structure, interactions, and viability. The emphasis is on epidemic diseases and specific epidemic episodes. In most parts of the Americas, disease transfer and depopulation occurred early and are poorly documented. Because of the lateness of Euro-American contact in the Pacific Northwest, however, records are relatively complete, and it is possible to reconstruct in some detail the processes of disease transfer and the progress of specific epidemics, compute their demographic impact, and discern connections between these processes and culture change. Boyd provides a thorough compilation, analysis, and comparison of information gleaned from many published and archival sources, both Euro-American (trading-company, mission, and doctors' records; ships' logs; diaries; and Hudson's Bay Company and government censuses) and Native American (oral traditions and informant testimony). The many quotations from contemporary sources underscore the magnitude of the human suffering. *The Coming of the Spirit of Pestilence* is

a definitive study of introduced diseases in the Pacific Northwest. For more information on the author go to <http://roberttboyd.com/>

Before invasion, Turtle Island-or North America-was home to vibrant cultures that shared long-standing philosophical precepts. The most important and wide-spread of these was the view of reality as a collaborative binary known as the Twinned Cosmos of Blood and Breath. This binary system was built on the belief that neither half of the cosmos can exist without its twin. Both halves are, therefore, necessary and good. Western anthropologists typically shorthand the Twinned Cosmos as "Sky and Earth" but this erroneously saddles it with Christian baggage and, worse, imposes a hierarchy that puts sky quite literally above earth. None of this Western ideology legitimately applies to traditional Indigenous American thought, which is about equal cooperation and the continual recreation of reality. *Spirits of Blood, Spirits of Breath* examines traditional historical concepts of spirituality among North American Indians both at and, to the extent it can be determined, before contact. In doing so, Barbara Alice Mann rescues the authentically indigenous ideas from Western, and especially missionary, interpretations. In addition to early European source material, she uses Indian oral traditions, traced as much as possible to their earliest versions and sources, and Indian records, including pictographs, petroglyphs, bark books, and wampum. Moreover, Mann respects each Indigenous culture as a discrete unit, rather than generalizing them as is often done in Western anthropology. To this end, she collates material in accordance with actual historical, linguistic, and traditional linkages among the groups at hand, with traditions clearly identified by group and, where recorded, by speaker. In this way she provides specialists and non-specialists alike a window into the purportedly lost, and often caricatured, world of Indigenous American thought.

Spirit Song Simon and Schuster

A groundbreaking collection of essays and stories by, about, and selected by gay American Indians from over twenty North American tribes. From the preface by Randy Burns (Northern Paiute): Gay American Indians are active members of both the American Indian and gay communities. But our voices have not been heard. To end this silence, GAI is publishing *Living the Spirit: A Gay American Indian Anthology*. *Living the Spirit* honors the past and present life of gay American Indians. This book is not just about gay American Indians, it is by gay Indians. Over twenty different American Indian writers, men and women, represent tribes from every part of North America. *Living the Spirit* tells our story--the story of our history and traditions, as well as the realities and challenges of the present. As Paula Gunn Allen writes, "Some like Indians endure." The themes of change and continuity are a part of every contribution in this book--in the contemporary coyote tales by Daniel-Harry Steward and Beth Brant--in the reservation experiences of Jerry, a Hupa Indian--in the painful memories of cruelty and injustice that Beth Brant, Chrystos, and others evoke. Our pain, but also our joy, our love, and our sexuality, are all here, in these pages. M. Owlfeather writes, "If traditions have

been lost, then new ones should be borrowed from other tribes," and he uses the example of the Indian pow-wow---Indian, yet contemporary and pantribal. One of our traditional roles was that of the "go-between"---individuals who could help different groups communicate with each other. This is the role GAI hopes to play today. We are advocates for not only gay but American Indian concerns, as well. We are turning double oppression into double continuity---the chance to build bridges between communities, to create a place for gay Indians in both of the worlds we live in, to honor our past and secure our future. Published by Stonewall Inn Editions in partnership with St. Martin's Press, 1988.

Maliodoma Patrice Some was born in a Dagara Village, however he was soon to be abducted to a Jesuit school, where he remained for the next fifteen years, being harshly indoctrinated into European ways of thought and worship. The story tells of his return to his people, his hard initiation back into those people, which lead to his desire to convey their knowledge to the world. Of Water and the Spirit is the result of that desire; it is a sharing of living African traditions, offered in compassion for those struggling with our contemporary crisis of the spirit.

Our spirit clan may be an animal, or a plant, a stone, or some special object that has taken on spiritual power. Your clan is a reservoir of powerful energy. It helps carry you through troubled times and protects you from danger. The wisdom of their teachings shows the way to true peace and prosperity and to live in harmony with all that is. Drawn from tribes across North America, these are careful retellings of traditional stories such as Son of Light's quest to win back his captured wife from the monstrous Man-Eagle; humble Muskrat's noble self-sacrifice to establish solid land so other beings might live; Water Spider's creative solution for retrieving fire for all the animals; and White Buffalo Calf Woman's profound gift of the sacred pipe to the people. Each of the compelling stories in this collection illustrates principles that can guide you on your own spiritual quest. Now you can experience the wisdom of these teaching tales even if you have no previous knowledge of Native American traditions. SkyLight Illuminations provides insightful yet unobtrusive commentary that explains the cultural and spiritual significance of the seemingly mundane objects found in these stories--tobacco, gambling, even the exploits of mischievous tricksters such as Coyote and Weasel--while gracefully drawing comparisons to Christian, Jewish, Buddhist and Hindu religious traditions, among others. Whatever your spiritual heritage, these Native American stories of the sacred are sure to delight and inspire you with the sacredness of all Creation, and remind you that the earth does not belong to us--we belong to the earth.

Between A.D. 700 and 1100 Native Americans built more effigy mounds in Wisconsin than anywhere else in North America, with an estimated 1,300 mounds—including the world's largest known bird effigy—at the center of effigy-building culture in and around Madison, Wisconsin. These huge earthworks, sculpted in the shape of birds, mammals, and other figures, have aroused curiosity for generations and together comprise a vast effigy mound ceremonial landscape. Farming and industrialization destroyed most of these mounds, leaving the mysteries of who built them and why they were made. The remaining mounds are protected today and many can be visited. Explores the cultural, historical, and ceremonial meanings of the mounds in an informative, abundantly illustrated book and guide. Finalist, Social Science, Midwest Book Awards
